

PPL Electric Utilities

Turn your energy savings into profits

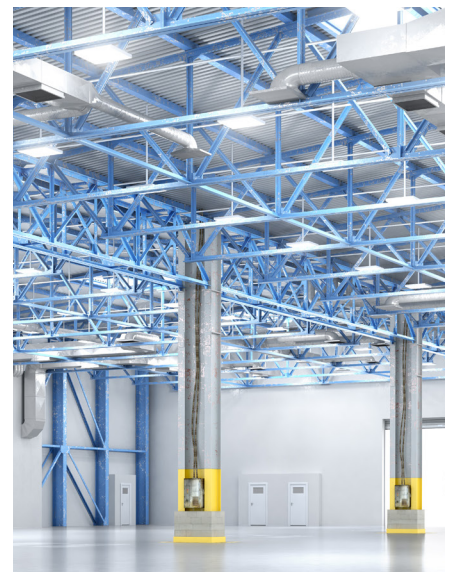

Welcome to the PPL Electric Business Energy Efficiency Program

Everything your business needs to save energy is now under one roof. Our Business Energy Efficiency Program aims to give you easy opportunities to lower your annual energy costs, connect with local contractors, save on high-efficiency upgrades and more.

Whether your business is small but mighty, large yet local or anywhere in between, we offer a variety of flexible prescriptive and custom incentive options to help you reach your energy efficiency goals.

Your path to savings

All business customers with facilities in our service territory are eligible to participate. We help you find the path that's right for you – from prescriptive and custom incentives, to our Direct Discount and Instant Discount Programs – so you can start saving energy all year.

Prescriptive and custom incentives increase the ROI of installing energy-efficient equipment. Eligible upgrades include, but are not limited to:

- Compressed Air
- Refrigeration
- Lighting
- Process Improvement
- HVAC Upgrades and Tune-Ups
- Variable Frequency Drives (VFDs)
- ENERGY STAR® Certified Smart Thermostats

Business incentives structure*

Project category	Incentive	Project category	Incentive
 Lighting and Efficient Equipment	\$0.05/kWh	 CHP/Solar	\$0.03/kWh
 Custom	\$0.06/kWh	 HVAC Tune-Ups**	Under 1 ton: \$60 1–5 tons: \$75 Over 5 tons: \$125
 Direct Discount Program	\$0.10/kWh	 ENERGY STAR® Certified Smart Thermostats	\$15/unit

*Pre-approval is not required for prescriptive applications. Project pre-approval continues to be recommended and encouraged to accurately calculate savings and incentives. However, pre-approval may be waived by PPL Electric on custom projects when project savings can still be accurately captured without pre-approval. The Direct Discount Program requires pre-approval prior to construction beginning on all projects other than HVAC tune-ups and smart thermostats. Pre-approval means that a project application must be submitted in good order and receive a pre-approval letter before construction begins. All projects must be submitted, with all documentation in good order, within 180 days of the project completion date. Incentives are capped at 50% of project cost, up to \$500,000. Incentives for Direct Discount Program are capped at 80%.

**Standard prescriptive application required. HVAC tune-up applications must include before and after cleaning photos, and name plate photo in place of specification sheets. Customers cannot have a current HVAC maintenance contract or received a tune-up in the last 3 years to be eligible.

Our Direct Discount Program lets small businesses with a GS1 or GS3 rate code save \$0.10 per kWh on eligible refrigeration, compressed air, HVAC upgrades and tune-ups, smart thermostats, domestic hot water and lighting projects – covering up to 80% of the project cost.

Planning a new construction project or major renovation? We offer assistance and incentives for equipment beyond the code minimums. All PPL Electric Utilities non-residential customers can get **instant discounts** on qualified lighting, HVAC, food service and agriculture products and equipment when you purchase from local participating distributors. Just provide your PPL Electric Utilities account number. No forms or applications required.

Your step-by-step guide to savings

We're here to guide you through every step of the application process and help you identify the incentive or program that fits your business best. Here's how it works:

- 1 Find a contractor.** Use our handy Find a Contractor tool on our website to connect with local experts and discuss eligible measures.
- 2 Set up an account and apply** for your rebate online at ppllectric.com/businessrebates.
- 3 Reserve your funds** with approval from our program team and, if required, get a pre-verification.
- 4 Install** your energy-efficient equipment or systems.
- 5 Submit** your final application and supporting documentation (itemized invoice, scope changes, etc.) as needed.
- 6 Prepare for final review.** Watch for email requests for additional documentation or a post-site verification, if required.
- 7 Receive your incentive check** in approximately 4–6 weeks after completion of final review.

Program availability and incentive levels are effective April 1, 2023, and are subject to change and/or termination without prior notice. Incentives and discounts are for non-residential PPL Electric customers and are subject to customer meeting program eligibility. The costs of energy efficiency programs are recovered through customer rates in accordance with the Pennsylvania Act 129 of 2008. PPL Electric Utilities assumes no responsibility for the performance of the equipment or equipment warranty, the quality of the work, labor and/or materials supplied, and/or the acts or omissions of any contractor. Refer to Terms and Conditions on ppllectric.com/businessrebates.
